

CANZA's Trailblazing Journey

Advancing Net-Zero Agri-food Systems in Canada and Beyond

CANZA COP28 Announcement

December 10, 8:30 - 8:45AM local time, Canada Pavilion

CANZA is a groundbreaking, national alliance uniting agri-food value chain stakeholders across Canada. This collaborative effort is dedicated to mobilizing investment, scaling up innovative projects, advocating for bold policies, and creating market incentives to mitigate 150Mt of emissions from Canada's agri-food sector by 2050.

Recently launched in Canada, CANZA has diligently worked on the development of an MRV Framework, focusing initially on soil organic carbon, which will serve as a guiding force for our initiatives over the next 5 years. This milestone marks a significant step towards establishing a

low-cost, and nationally relevant MRV system tailored specifically for the needs of Canada's agri-food sector.

This announcement will include remarks from the Founding Partner Circle of CANZA including [RBC](#) and [Nutrien](#) and research and development collaborators the [Arrell Food Institute](#) and [Hebert Grain Ventures](#).

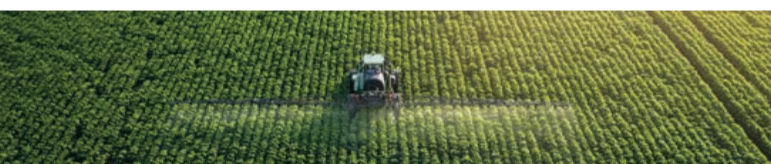

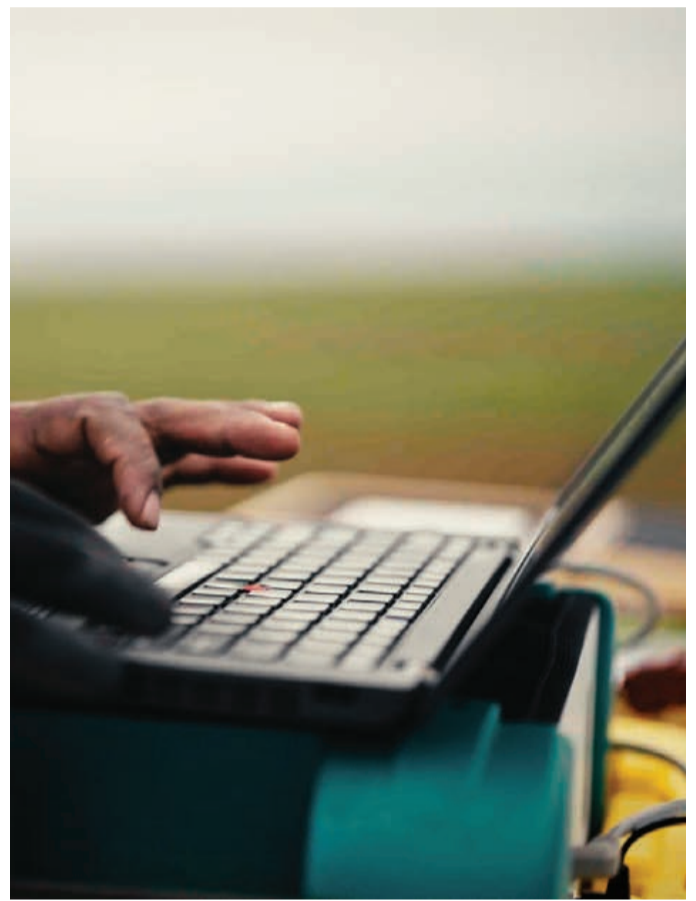

Join us as we introduce CANZA on this international stage and highlight not only its importance in Canada's journey toward a net-zero agri-food system, but also how it will provide a significant contribution to international efforts in agricultural decarbonization.

Canada's Earthshot A Net-Zero Agri-food System

December 6, 10:30 - 11:30AM local time
Sustainable Agriculture for the Americas Pavilion

Embark on an inspiring session with leaders from the [Canadian Alliance for Net-Zero Agri-food \(CANZA\)](#), an industry-led alliance dedicated to mobilizing investment, advancing innovative projects and advocating for bold policies united across the agri-food value chain. CANZA aims to mitigate 150Mt of emissions from Canada's agri-food sector by 2050.

Joined by experts from the [North American Meat Institute](#) and [Hebert Grain Ventures](#), panelist conversations will dive into the intricacies of CANZA's Climate-Smart Farming initiative, exploring insights from the MRV Framework and its application in Saskatchewan. Join CANZA champions as they emphasize the crucial role of cross-sector collaboration in achieving these ambitious goals and delve into how monitoring, verifying and reporting on agricultural emission reductions are steering the transition toward climate-smart farming. Engage in this transformative discussion shaping the future of sustainable agriculture in Canada and beyond.

Cultivating Change: Canada's Journey to Net-Zero Agri-food

December 9, 1:00 - 3:00 PM local time, BCG Pavilion

This event is a gathering of thought leaders, policymakers, industry experts, and stakeholders to converge, share insights, and forge pathways toward a sustainable agri-food system. Through engaging panel discussions, you will hear from leaders at the [Arrell Food Institute](#), [RBC](#), [Nutrien](#) and [CANZA](#), who will highlight the urgency to act, showcase innovative solutions, and emphasize the vital importance of collaborative action.

Connect with trail blazers leading the charge in sustainable agriculture in Canada, providing a unique opportunity to gain profound insight into challenges and opportunities within agri-food systems. Leave with a comprehensive understanding of how to support CANZA's initiatives, contributing to our shared goal of transforming Canada's agri-food system into a sustainable, net-zero operation and journey toward a more resilient and environmentally conscious future for our agricultural landscape.

[RSVP](#) for this event here.

Charting the Path to Net-Zero with CANZA's Climate-Smart Farming and Collaborative Solutions

December 10 Panel: 4:00 - 5:00PM local time, Reception: 5:00 - 6:00PM, Saskatchewan Pavilion

Moderated by the [Honourable Scott Moe, Premier of the Province of Saskatchewan](#), participants will hear from panelists from the [Arrell Food Institute](#), the [University of Saskatchewan](#), [Hebert Grain Ventures](#), [Nutrien](#) and [RBC](#) about why unlocking a low-cost, nationally relevant MRV system is pivotal for advancing low carbon agriculture and inspiring the widespread adoption of innovative technologies.

This inspiring session led by the [Canadian Alliance for Net-Zero Agri-food \(CANZA\)](#) will offer insights and ideas around the transformative potential of MRV systems to support producers in their transition toward climate-smart farming practices.

We invite you to be an active participant in this conversation to shape a sustainable agricultural path in Canada and make impactful contributions to global knowledge and practices, particularly within the dynamic domain of MRV systems.

Our Vision

A circular, net-zero agri-food system for Canada.

Our Mission

Mitigate 150 Mt of emissions from Canada's agri-food sector by 2050.
